For you we have developed a container from our wealth of experience, a container that offers new solutions.

The large choice in COMBINATIONS is typical of OTTO products. All spare parts are interchangeable with the OTTO plastic 1100 litre container keeping the stock of spares required to a minimum

Available in various sizes and with several lid options, this containers is suitable for many different applications.

The Container

All versions of the new **SteelCombi** come complete with integrated combobar receiver as well as quiet running heavy-duty, solid rubber tyre castors with hubs manufactured from plastics of **Hot-Dip Galvanised Steel** 200mm Ø, swivelling through 360° degrees.

Special versions on request. All containers with GS sign (tested and approved safety).

Quality In Every Detail

The combination of robust **Galvanised Steel** and our well-proven plastic parts are the basis of the new **OTTO SteelCombi**. Four swivel castors provide the container with the required mobility and its volume ensures economical collection. The cone shaped body and the water outlet plug in the bottom ensure easy cleaning, and makes an important contribution to hygiene.

This container reflects 60 years of experience within the OTTO Group in the field of waste management.
